10 Reasons to Study Abroad

1. Gain Independence
2. Immerse Yourself into a New Culture
3. Stand out to Employers
4. Broaden your Knowledge
5. Discover Yourself
6. Travel the World
7. Expand your Network, Make Friends from Around the World
8. Learn a New Language
9. Find Hidden Gems
10. Enjoy Coming Home

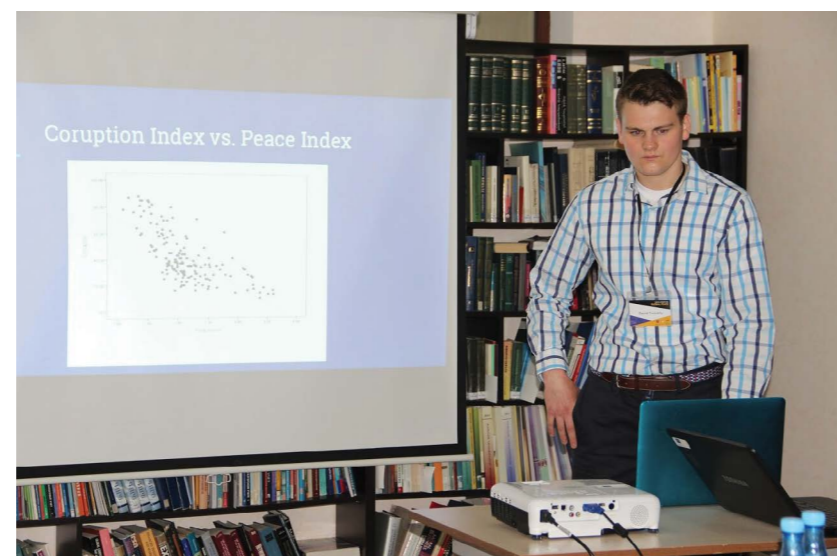

Study in Armenia! WHY?

1. Tuition fees for quality education are AFFORDABLE
2. It's not a huge hustle to get Armenian visa
3. Living costs will amaze you
4. Living accommodations are affordable in Armenia
5. Armenian cuisine is YUMMY
6. There is a huge history to explore
7. Welcoming, friendly and SAFE environment
8. Feel real adrenaline: the longest ropeway in the world, paragliding, climbing, ski and snowboard etc.
9. Taste the most delicious water in the world FREE from tap
10. Make friends with kind and hospitable locals

STUDY at EURASIA International University! WHY?

1. High quality of education at an affordable cost

The education for students enrolled in degree programs at all levels from Bachelor's through Master's and PhD degree programs are affordable. Tuition fees for Bachelor's, Master's and PhD programs vary from \$1,800–3000 depending on the study program.

2. Guaranteed accommodation

The EIU has student dormitories and we guarantee students rooms in comfortable residences.

3. Study abroad options and double degree programs Erasmus+

EIU partners with number of EU universities giving the students opportunities to study abroad for a semester or two. Upon return, EIU recognizes the credits earned abroad.

Among the renowned partners are the following universities:

- | | |
|--|---|
| 1. University of Lodz (Poland) | 9. Warsaw School of Economics (Poland) |
| 2. Vilnius University (Lithuania) | 10. Middle East Technical University (Turkey) |
| 3. International Hellenic University (Greece) | 11. Masaryk University (Czech Republic) |
| 4. University of Teramo (Greece) | 12. Mykolas Romeris University (Lithuania) |
| 5. Powiślański University in Kwidzyn (Poland) | 13. Aristotle University of Thessaloniki (Greece) |
| 6. Instituto Politécnico de Tomar (Portugal)r | 14. Santiago de Compostela University (Spain) |
| 7. Sapienza University of Rome (Italy) | 15. University of Valencia (Spain) |
| 8. Warsaw University of Life Sciences (Poland) | 16. Cyprus University of Technology (Cyprus) |

Double degrees

1. Warsaw University of Economics and Human Sciences (Poland)
2. University of Tuscia (Italy)

Explore the brochure to find out about the EIU International Double Degree programs.

4. Recognized programs: International Accreditation

The EIU is accredited based on the “Standards and Guidelines for Quality Assurance in the European Higher Education Area” (ESG) by the National Center for Professional Education Quality Assurance Foundation (ANQA). It is one of only several private Universities in Armenia having an institutional and international accreditation (out of 25). You may find the list of accredited institutions of Armenia in the Institutional Accreditation State [REGISTER](http://www.anqa.am) (www.anqa.am)

5. Strong focus on employability

EIU educational programs, teaching and learning methods are designed to preparing students for lifelong career success. The interpersonal and professional skills the students need to succeed in their occupation is in the core of the curriculum. EIU ensures the students are “work-ready” as soon as they graduate for which implements programs and career support services.

6. Practical Education

EIU partners with employers for practical education: tailored internships, master classes and employer teaching at the university is the core of the educational programs. Since the beginning, we are a modern and dynamic university. We follow trends and listen to experts. We teach in a flexible and effective way. The university cooperates with many companies and institutions, that's why our courses are adapted to the labor market's needs. It means, that after finishing your studies there is no need to worry about your professional future.

Possible pathways at EIU

What can I study at Eurasia International University?

Your path to an undergraduate degree

PREPARATORY

- EIU organizes Preparatory courses both for Armenian and International students. The educational programs are in line with the State and EIU entrance requirements.
- Final examinations of the Preparatory Department serve as entrance examinations for the first year of the academic studies.
- The minimum duration of the Preparatory Courses is 6 months (January-July)

Application deadline: 1 November

Bachelor's degree programs

(4 years, 240 credits)
Pharmacy

A Bachelor Degree in Pharmaceutical Sciences is a four-year program designed for students who want to work in the drug or health care industries. Applicants should have a background in science, although the program is open to all students with a high school diploma.

In a Bachelor Degree in Pharmaceutical Sciences the students learn about the research, testing and manufacturing of pharmaceuticals. The program is science-intensive with a focus on chemistry and biology. The followings are the common courses:

- Pharmaceutical chemistry
- Anatomy and physiology
- Introduction to pharmacology
- Microbiology
- Pharmtechnology
- Pharm management and economics etc.

Popular Career Options

In addition to a career as a pharmacist, which requires further education, graduates with a bachelor's degree in pharmaceutical sciences are qualified for many other careers. These include:

- Pharmaceutical research
- Drug production and testing
- Pharmaceutical sales
- Drug marketing etc.

Management

Managers play a vital role in any organisation as they are responsible for organisation growth and development. This program will enhance students with profound theoretical and practical knowledge in core management subjects such as Operational and strategic management, finance, marketing, human resources and research methods, etc. Apart from core subjects students have the opportunity to select courses of their interests among a range of courses such as:

- Entrepreneurship,
 - Digital Marketing,
 - Sales,
 - Advertising,
 - Banking,

Quality Management, etc.

The course also trains students' soft skills such as critical thinking, effective communication skills, and leadership necessary to succeed in today's competitive labor market.

Popular Career Options

With a bachelor's degree in business management, graduates are qualified for entry-level through middle-level supervisory roles within various industries. Some graduates seek entrepreneurial opportunities. Possible careers include:

- Sales manager
- Marketing manager
- Financial analyst
- Business consultant etc.

Information Technologies

The purpose of this program is to immerse students in multiple facets of information technology and computer technology. Students often learn the techniques necessary to manage information systems. Experienced professors provide knowledge about internet systems, databases, digital networks, computers, and programming software. Additional topics covered include communications, business, and management. Graduates often end up working for a wide variety of businesses, so it's important for them to be well versed in critical thinking and other everyday skills.

Degree candidates take classes in the liberal arts and sciences, general business, and computers and technology. Topics may include the following:

- Managerial operations analysis and economics
- Business systems, data and communication
- Information systems and operating strategy
- Computer programming and technology
- Data structures
- Artificial Intelligence
- Machine Learning
- Digital systems etc.

Popular Career Options

Graduates are qualified to work in various areas of IT, including telecommunications and network support, information systems management, database development and maintenance, programming, security and end-user support. Possible positions for individuals holding a bachelor's degree in information technology may include:

- Database manager
- Hardware analyst
- Applications programmer
- Computer security analyst
- Information systems manager
- Quality assurance analyst etc.

Most graduates get job offers from European and North American IT companies.

Foreign Languages and Literature

Bachelor's degree in Foreign Languages and Literature (English, French, German) offers students the possibility to achieve high proficiency in foreign languages. The program is aimed at developing analytical and critical thinking skills in the scope of foreign language teaching methodology and pedagogy. Some courses look at the history, grammar, and ancient forms of the languages, such as classes that relate to linguistics. Students can also concentrate on literature courses covering particular genres or time periods. Creative writing may be another area of interest within language programs.

The study of linguistics covers such topics as etymology and phonetics, while literature courses look at writing styles throughout history. The student also has an option to take part in interdisciplinary programs (Internal Dual Degree, Minor) and differentiate herself/himself in the labor market. With excellent language skills the students may also start a career in Project Management, Internet Marketing etc. See the list of internal Dual Degrees and Minor programs below. Some common courses for an English language program are included below.

- Introduction to English (German, French) Linguistics
- English (French/German) Grammar in context
- Foreign literature and culture
- Applied linguistics and literary theory
- Expository writing and English composition
- Conversation and composition
- Rhetoric and Language studies
- Intercultural communication
- TEFL (English) / FLE (French)/ GFL (German)

Popular Career Options

Individuals who graduate with a bachelor's degree in language have a variety of employment opportunities to choose from. Possible industries include, but aren't limited to law, media, and business. Some language graduates find employment in public relations and communications, while others enter the fields of education and journalism.

- English (French/ German) teacher
- Copywriter
- Editorial assistant
- Reporter
- Managing editor or technical writer
- Speechwriter
- Language teachers in primary, secondary and high schools
- Language instructors
- Communication specialists etc.

Law

Bachelor's programs in legal studies place a strong emphasis on research, writing and critical-thinking skills as well as on the historical and theoretical foundations of law. The program prepares students for entry-level positions in fields where knowledge of the legal system is expected or beneficial. Common topics include constitutional interpretation, legal processes, producing legal documents, legal analysis, human rights protection and ethical principles.

Common coursework of a legal studies bachelor's degree program includes:

- Social theory
- Legal systems
- Constitutional and business law
- Human rights protection
- Legal ethics
- Legal writing and research etc.

Popular Career Options

Lawyer in International, Diplomatic Institutions and Non-Governmental Organizations, Attorney, Legal Analyst, Document Drafting Lawyer, Legal Journalist, Legal Advisor, Government Lawyer, Human rights defender.

JOURNALISM

Program Description

The aim of the "Journalism and Media Management" master's degree program is to educate students who will master the skills of creating media content applying the knowledge on journalism, new media and technologies. During the educational program, students have the opportunity to carry out educational research using modern tools, to design the process of media production and organize media publication. The program allows students to specialize in multimedia journalism or PR sphere, as well as to acquire managerial skills.

Popular Career Options

- TV and radio journalist
- Multimedia producer
- Presenter of news service or other programs
- In editorial offices as a photojournalist, coordinator or producer
- Public Relations (PR) in International Companies
- SMM and Content Man

Finance

The aim of the bachelor's degree in Finance is to develop the student's knowledge and skills necessary for the profession of financial specialist. Students are taught accounting, statistics, risk management, taxes, banking, and other subjects during the program.

Popular Career Options

Graduates can work at financial institutions such as Central Bank, tax authorities, financial departments of various organizations, consulting companies, etc.

Link with employers.

The participants of the program regularly participate in the master classes of the guest employer-lecturers, during which they not only gain practical knowledge, but also valuable acquaintances with the employers. The internship opens wide horizons, after which our students are often invited to work by the employer.

ELEMENTARY PEDAGOGY

The profession of Elementary Pedagogy aims at developing fundamental and systematic knowledge of the principles of pedagogy and psychology based on new educational technologies. The Students will have the opportunity to understand the content of elementary school education, its features, as well as develop the abilities and skills for teaching elementary educational programs.

Throughout the study process, the students are involved in practical work in several partner schools, implementing various projects. They use the acquired knowledge in practice as well as in research works.

Popular Career Options

After graduating from the university, graduates will be able to work at schools, pre-school institutions, departments of educational management, extracurricular institutions in the following positions:

- Elementary School Teachers
- Teacher-facilitators
- Methodist
- Civil Service Managers of Educational Institutions, etc.

Your path to a postgraduate degree

Master's degree Programs

(2 years, 120 credits) **Master's degree in Management**

A Master in Management is specifically designed for professionals who wish to achieve a senior leadership position. With a Master in Management, you will gain the necessary analytical and personal skills to lead in a wide range of management positions, in private, public, for profit, and non-profit sectors. You will learn planning, staffing, directing, organizing, and controlling an organization with the purpose of achieving a common goal.

Master's degree in Project Management (MPM)

The Project Management MSc aims to help students take the first step towards a career in the dynamic field of project management. Project Management uses organisational initiative to complete a range of tasks such as the construction of new buildings, developing

the next app or design innovations in the healthcare industry. Underpinning the fundamentals of the field is the need to manage projects within constraints including time, cost, quality and scope. In the MPM project-based curriculum, business case studies and simulations are integrated into the classroom, bringing lessons to life. You will be able to: Connect your technical skills and expertise with critical communication and leadership skills; Practice scholarly research, data collection and analysis, and other academic methods; Make use of emerging trends such as agile or scrum techniques to successfully manage and move complex projects through the lifecycle etc.

Master's degree in Electronic Business Management (MEBM)

e-Business Management is designed for people looking to operate effectively in the e-business environment and

to manage or lead either the transformation of existing business processes or the creation of new e-business activity. This degree will equip you with the techniques to manage the strategic development of e-business based organisations and appropriate e-business technologies. You'll develop the skills and knowledge to evaluate, manage, and improve the operational functions of an organisation and to apply the concepts of systems integration to the design and development of products and services through market analysis. The program focuses not only on online businesses, but also very much on the online activities and communications across more traditional organisations. Online engagement is a defining feature of today's business environment, and as such is an essential element for most businesses, governments, and institutions.

Master's degree in Hospitality Management (MMH)

Hospitality degrees are for people who want to see the world, enter an industry that continues to grow and change. It is for people who love teamwork and face-to-face interaction. A hospitality management degree gives you the chance to follow your interests in limitless locations, making unforgettable experiences and giving you a highly rewarding career. Whether your aspirations are corporate or boutique, startup or expansion, domestic or global, the MMH can add value, focus, and velocity toward reaching your goals.

Master's degree in Foreign Language and Literature

M.A. in English Language and Literature is designed to develop ground knowledge on language teaching methodologies, curriculum and materials development, testing as well as second language acquisition and TEFL research. M.A. TEFL students discuss and apply instructional models, innovative instructional technologies and linguistic theories which relate classroom experiences of EFL students to real life communicative needs. They also improve their skills in understanding and conducting research in foreign language education.

Master's Degree in Information Systems (MIS)

The Master of Information Systems degree program features a rigorous course of study that involves projects, case studies, and presentations. The curriculum focuses on creating and maintaining systems with-

in a corporate business environment, with courses in business management and project management. Topics covered in a program may include: Information system strategies; Customer relationship management; Data management; Technical services management; System development; Information technology management etc.

Master's degree in Law (M.L.)

With a Master's degree in law you are able to apply legal methodology at a specialized level within complex parts of the legal system. This means that you are able to identify, analyze and solve theoretical and practical legal issues in a systematic way. You can take on a variety of jobs in businesses or private organizations – nationally as well as internationally.

Master's degree in Constitutional Law, Theory of Law and State

Master of Law with a constitutional law concentration provides an excellent preparation for law school or further studies related to legal issues. Graduates may also enter law-related careers in a variety of fields, including education, journalism, public policy and government. This degree program enhances students' reasoning abilities, analytical skills, research talents and writing capabilities. Students develop a deep understanding of law and public policy. The curriculum also enlightens them on the interrelationships between constitutional principles and Supreme Court decisions. The importance of research is emphasized throughout the curriculum.

Master's degree in Civil Law and Procedure

Civil Law is an internationally recognised program designed to teach students about the relationship between organisations and individuals. The syllabus deals with the rights of individuals in law and what their legal options are in relation to the governing laws in a specific country. If a person suffers as the result of an accident at work, or feels a contract is unfair, or has a dispute regarding a property, then civil laws are exercised.

Master's degree in Criminal Law and Procedure

This type of program typically helps students develop in-depth knowledge about the criminal justice system and how it relates to the law. Classes may cover topics such as criminal procedure, laws, security, and

investigative techniques. Each course is designed to give students a deeper understanding of what laws mean and how to fully investigate crimes while following criminal law procedures.

Master's degree in International and European Law

Develop an elaborate understanding of European and international law including in-depth knowledge on the external dimension of EU law and the rules that govern the European Union's international relations.

Master's Degree in JOURNALISM

The aim of the "Journalism and Media Management" master's degree program is to educate students who will master the skills of creating media content applying the knowledge on journalism, new media and technologies. During the educational program, students have the opportunity to carry out educational research using modern tools, to design the process of media production and organize media publication. The program allows students to specialize in multimedia journalism or PR sphere, as well as to acquire managerial skills.

Master's Degree in Elementary Pedagogy

The aim of the Program is to prepare future specialists equipped with enhanced research skills and in-depth pedagogical knowledge, who will be able to carry out professional and pedagogical, as well as scientific research activities. Meantime, they will be able to identify problems related to the profession, adopt the new practices of teaching methods and approaches as well as adjust them to the culture and educational programs of the Armenian students and develop education programs.

Elementary Pedagogy master students must be able to conduct research, develop and apply various teaching models, teach using innovative technologies, as well as, master all the tools of pedagogical psychology.

Organization of Banking Activities

The program is designed for all the applicants wishing obtain in dept knowledge in the sector of banking and finance. The program is practical, and the teaching is based on the latest developments in the above-stated sector, including the study of the latest innovations and digital transformations.

PHD programs (Candidate of Sciences)

(3-4 years, 180 credits)

The duration of the full time post graduate program is three years; for part time studies the duration is four years.

HOW TO APPLY

Join us at EIU in 7 simple steps

1. Choose your pathway (study level, program)

2. Pay administration fee and submit the required documents: <https://bit.ly/362PnUu>

3. Learn the admission decision

4. Wait! We will work on getting the MOE approval and the visa

5. Receive the FINAL decision and acceptance letter via e-mail

6. Book your flight and send us the itinerary

7. Arrive in Armenia, we look forward to welcoming you at EIU!

"I study at Eurasia International University (Pharmacy department). Why I chose Armenia? Because I have been in touch with Armenians in my country and they were very friendly: this encouraged me to search for universities in Armenia. I have seen many good universities but the best one meeting my choice requirements was the Eurasia International University. In our department the lecturers are the Best of the Best. I would like to thank all my professors and the administrative staff for their efforts".

*Asseel Thaer Ibrahim Al_dabbagh
Pharmacy department
(Iraq)*

EURASIA INTERNATIONAL UNIVESITY REVIEW

“This university is like the country, very nice. It's like a great family. There are number of courses offered in English and professional faculty. The faculty and staff is very much supportive during the studies, as well as research. The EIU students are amazing and our student buddies (mentors) were the best: they not only support the international students during the studies, but also help to explore the country, visit incredible places like Dilijan or Sevan Lake”.

*Jesús Siso Bermúdez
Exchange student
Santiago de Compostela University (Spain)*

DOUBLE DEGREE PROGRAM IN COOPERATION WITH THE THE UNIVERSITY OF TUSCIA (ITALY)

The Master's Degree Programme, entirely delivered in English, offers an educational path in which the traditional dichotomy security vs freedom is revisited in light of three main contemporary challenges: migration, technology and sustainability. The aim of the Programme is to provide students with the multidisciplinary competences they need to disentangle complex phenomena and to work in strategic fields and high-level innovation sectors, such as migration and border security, new technologies, privacy and data protection, green economy and politics of sustainability.

The first year is aimed at acquiring basic knowledge relating to the problem of security. The second year includes two alternative paths or sets of courses with a higher level of specialization.

The first path (Security and Human Mobility) is dedicated to migratory processes, with two semesters concerning:

1. the external security of borders and the management of migratory flows in the Euro-Mediterranean area (The External Dimension);
2. the internal security and the processes of legal, economic and cultural integration of immigrants (The Internal Dimension). The second path (Security, Technology and Sustainability) provides skills related to the new challenges that the use of technology poses for fundamental rights, with two semesters concerning: i) Privacy and Data Protection; ii) Green Security.

Elective activities

- annual Summer Training School
- Internships and Stages
- Final Exam/Dissertation

Scholarships AND support

- beneficiaries of the call will benefit of:
- full tuition fee reduction (in any case the student must pay only the revenue stamp);
- one year of free accommodation at the student residence or, in case of unavailability of places, a reimbursement for private accommodation costs (up to a maximum of 180 €/month up to a maximum of 12 months);
- one free meal per day – from Monday to Saturday – during the academic year, at the student Canteen or affiliated restaurant in Viterbo. Students in programs

though in other locations will receive a reimbursement of € 100,00 per month as a contribution for meals;

- reimbursement of Visa and travel costs from their Countries to Italy, up to a maximum of 500,00€ (upon presentation of the required documentation). Accommodation and meals will be ensured for the second semester only if the student will obtain at least 12 ETCS in the first semester.
- Scholarship of € 4.860,00/year
